

Ailen Gonzalez

UX/UI Designer

Profile

I like to create simple, accessible and modern interfaces, working in the whole process, since the design to the development. I believe technology, combined with good user experience, can transform the way people communicate, learn and develop their life.

My latest experience is working with Vue.js, Nuxt.ui and Tailwind in the web3 ecosystem. I've been participating in hackathons, groups and communities to gain more experience in this area.

Work experience

September 2022 - Present

Web Designer - Loymark S.A.

Design and development of websites and applications for several important clients in America, using HTML, CSS, Bootstrap, Figma, JavaScript.

February 2021 - September 2022
